8:30pm - 8:45pm

Annual General Meeting and Dinner

6:30pm - 7:30pm Lecture 1: Pre-exposure Prophylaxis for HIV Prevention

Speaker: Dr Winston Goh

General Practitioner, OT&P Healthcare

HIV still remains a serious threat to the health and lives of people in Hong Kong. This lecture will focus on the efficacy and safety of Pre-exposure Prophylaxis, which is being used in other parts of the world such as the United States, London and Sydney to prevent HIV transmission in high risk populations.

7:30pm - 8:30pm Lecture 2: Globalising Mental Disorders in the Age of World Citizenship, Experts and Technology

Speaker: Dr Harry Yi-jui Wu

Assistant Professor, LKS Faculty of Medicine, HKU

This talk traces how mental disorders became comparable worldwide through the making of metrics. It focuses on WHO's first international social psychiatry project, which originated from the post-WWII ideology of world citizenship, shaped by a group of visionary and trained individuals, and expedited by the quest of technology. It details how ways of understanding mental disorders are contingent upon the changing values, perceived nature of evidence, technological infrastructure, and collectively pursued scientific methods in the world we live in.
